TECHNICAL INFORMATION

Virgola is a dining table designed by Claudio Bellini to meet the different needs of the space of the contemporary home, thanks to its extendable function. The project is characterized by flexibility and functionality, without sacrificing the value of contemporary design. "Virgola is an extendable table inspired by the culture of dining together", an expression of conviviality. With a light and refined appearance, the Virgola table is available in two color versions and mixes with an elegant single-color and single-material FENIX top - expression of an innovative and performing material.

PRODUCT DETAILS

Extendable rectangular dining table made up of legs in metal tubular with laser cut processing with upper cap turned in slab - in coffee black or traffic gray finishes.
Top in FENIX orimoco cacao finish or in ephesus gray coupled and supported by an MDF top.
Aluminum mechanism with pull-out opening on one side and fixing with 2 lateral screws.
Extension that can be fixed to the top, available in two sizes 40x90 or 50x100.
The finish of the extensions is in Marmor Marquina in combination with the top in Fenix cacao; In Imperial Gray for the Ephesus gray Fenix top.
FENIX single color: an innovative and performing material.
The laminate extension is in marble shades for the light gray version and in stone shades for the dark brown version.
Anti-fingerprint matte Fenix top with high abrasion resistance.
